Note:

No. 161-21 - Rhynchophorous beetle found on wild grape, Rio Piedras, P. R.

335-17 - Coccinellid beetle found feeding on Chrysomphalus dictyospermi on Cycas revoluta. H. T. Cotton, Waguabo, P. R.

132-21 - Coccinellid beetle found feeding (as larvae) on Toxoptera aurantiae on coffee, Lares, P. R.

98-21

April and June 1921.

(Mr. Wolcott's letter 8/8/21).

THIS REFERENCE SLIP SHOULD BE
☞ Return this slip with your reply. 8—1549
RETURNED TO THE CHIEF CLERK OF
THE BUREAU WITH YOUR REPLY.

Fiji
161-21 - Rhynchosia beccle. belongs to the Leguminosae Tribe Phaseoleae
and near the genus Rhynchosia
to the Centrosemeae. The genus is quite different from the
North American Phaseoleae going on Grapevine and the genera
Madagascar (Neodunhamia) Amphicarpa, Apios and Desmodium

The genus is in all probability undescribed and is not known at the
Royal Botanic Gardens, Kew.

335-17 This little Convolvulaceae is quite unknown to me. The two
specimens the author can not be exactly. so that the position of

132-21 (98-21 - Several species of this genus apparently allied to
Ipomoea are known to me from the West Indies and one of
them extends to tropical Florida. They are all undescribed but one of
them has been some years ago sent to Mons Sicard in Paris who is working on
a Monograph of Convolvulaceae. which however, is not yet published.
